**LOT 40 - Vintage wood baby high chair**

**Description**

Could use a good cleaning but it looks like everything is there. For some reason this high chair folds in half. I would imagine that is for easier storage, but it didn't look easier to me. The chair is approximately 39 in tall by 21 in across by 21 in deep at the base. Check out the last picture to see what I'm talking about as far as folding over.
